## KPI DEFINITIONS

### Spend:

The total marketing budget spent for ads in the given week. It includes costs associated with advertising on all platforms combined.

### Impressions:

The total number of times ads were shown to users during the week. This metric gives a sense of the reach of the marketing efforts but does not necessarily indicate user engagement.

### Clicks:

The number of times users clicked on ads. It indicates initial user interest in the advertised content.

### Installs:

The total count of app installations attributed to ad campaigns. This metric shows the effectiveness of ads in driving user downloads.

### Registrations:

The number of users who registered on the app after installing it. This helps gauge the success of onboarding new users from ads.

### Subscriptions: (Currently N/A)

The number of users who proceeded to subscribe after registering. This metric, when available, will show the rate of conversion from free to paid users.

### PSR (Projected Subscription Revenue): (Currently N/A)

The total revenue generated post-subscription, indicating the longer-term financial impact of acquired users.

### CPM (Cost per Thousand Impressions):

The cost incurred to generate 1,000 impressions. It indicates the cost efficiency of ad visibility.

### CPC (Cost per Click):

The average cost of each click. This metric helps assess the financial efficiency of generating interest in the ad content.

### CPI (Cost per Install):

The average cost per app installation driven by ad campaigns, which is essential for measuring cost-efficiency in attracting new app users.

### CPR (Cost per Registration):

The cost associated with each registration resulting from an ad. It reflects the efficiency in converting viewers to registered users.

### CPS (Cost per Subscription):

The cost associated with each subscription resulting from an ad. It reflects the efficiency in converting viewers to subscribed users.

### Spend YTD:

The cumulative amount spent on marketing efforts since the beginning of the year. It provides a broader perspective on budget utilization.

### Impressions YTD:

The total number of ad impressions achieved from the beginning of the year to date, indicating the reach of ad campaigns over a longer period.

### Clicks YTD:

The cumulative count of user clicks on ads, showing total engagement with ad content.

### Installs YTD:

The total number of app installations attributed to ad campaigns from the beginning of the year, demonstrating the total reach of ads in terms of new app users.

### Registrations YTD:

The cumulative count of new user registrations, showing how effectively ads have converted installs to registered users over the year.

### Subscriptions YTD: (Currently N/A)

The total number of subscriptions resulting from the marketing efforts over the year, when available, will reflect total paid user acquisition.

### Avg W/YTD:

The average metric value per week up to the date within the year, providing insight into weekly averages.
